PROFESSIONAL SUMMARY

Senior Data Engineer with experience building real-time data pipelines, event-driven systems, and AI automation on Microsoft Azure and Databricks. Skilled in ETL/ELT, data modeling, data lakes and warehouses, Kubernetes-based scaling, and LLM-powered agents.

TECHNICAL SKILLS

Languages: Python, SQL, C# | **Platforms:** Microsoft Azure, Databricks

Data Engineering: ETL/ELT, data modeling, data quality and validation, data lakes, data warehouses, real-time streaming, event-driven architecture

Cloud & DevOps: Azure Event Hubs, Azure Data Factory, Azure Blob Storage, Azure Kubernetes Service (AKS), KEDA, Kubernetes, Docker, Git, CI/CD, monitoring and alerting

AI & Analytics: AI agents, large language models (LLMs), retrieval-augmented generation (RAG), prompt engineering, Databricks AI/ML, Power BI

Databases: Oracle, SQL Server, Azure Cosmos DB, MongoDB

PROFESSIONAL EXPERIENCE

Senior Data Engineer | Bajaj Finance Ltd.

Aug 2024 - Present

- Designed and implemented RapidLR, a real-time lead response system processing leads from app and web platforms and routing data across microservices and analytical systems.
- Built an AI-powered ticket resolution agent on Databricks using LLMs to triage, categorize, and resolve support tickets, reducing manual intervention and mean time to resolution (MTTR).
- Deployed event-driven workloads on Azure Kubernetes Service (AKS) with KEDA-based autoscaling to support high throughput and efficient resource use during traffic spikes.
- Integrated real-time event notifications for marketing and engagement campaigns, including IPL and Asia Cup, to support customer engagement and conversion.
- Implemented monitoring, logging, and alerting to improve observability and enable proactive issue resolution.

Data Engineer | Bajaj Auto Finance Ltd.

Apr 2023 - Aug 2024

- Built ETL/ELT pipelines to automate ingestion, transformation, and loading from application databases, APIs, and third-party systems into a unified analytical environment.
- Optimized data models and storage structures to improve analytical query performance.
- Partnered with business and analytics teams to define data requirements, KPIs, and reporting standards.

Data Engineer Intern | Bajaj Auto Finance Ltd.

Oct 2022 - Apr 2023

- Supported ETL and data ingestion workflows; assisted with data cleaning, transformation, and modeling for reporting while developing knowledge of data lakes and warehouses.

EDUCATION

M.Tech, Artificial Intelligence & Machine Learning | Apr 2026 - Apr 2028 (expected)

BITS Pilani | Work Integrated Learning Programme

B.Tech, Mechanical Engineering | Jul 2018 - Jun 2022

Gautam Buddha University | Elective: Industrial Automation and Robotics

CERTIFICATIONS

Databricks Certified Data Engineer Associate
